Gene Inger Swing Picks	LAZR	Luminar will trade with the symbol LAZR as of Dec. 3; now that the reverse merger has been favorably voted upon. Luminar is autonomous driving; funded originally by Peter Thiel (Facebook and PayPal early on ) and now by Gore in Beverly Hills and also Volvo. Contracts with MobileEye and Audi too. Also; we view an inexpensive indirect way to play this as LightPath (LPTH) which may be their provider of infrared lenses and assist with modules. LightPath is growing nicely and is another of our selections.	2020-12-01 14:22:0	2021-02-08 09:30:2	69	\$17.50	\$33.85	96.80%	3492%

Rick's Picks Bold	SNDL	Sundial Growers Inc (SNDL). Buy at .59 3. We generally don't recommend 'penny stocks.' That's why this is a bold trade idea considering that some stock market trading activity has looked an awful lot like gambling as of late, with huge run-ups in companies that have shown little actual evidence of profits, or in some cases, sales such as SNDL. ALPHA INSIGHTS	SPCE	The shares of Virgin Galactic Holdings (SPCE) appear poised to resolve a classic patterned base formation of the "Cup & Handle" variety. A sustained bullish inflection above \$34 would project a measured move to approximately \$49, then \$75. The current short interest in the stock equates to 33% of the float. The fact that Cathy Wood's ARK Invest has filed to launch a space ETF (ARKX) can only help as there are only 5 pure play space travel issues in the public market and SPCE represents the largest and most seasoned of the bunch. In fact, ARK already owns the stock in several of its other ETFs, so we would expect her position to grow exponentially as the ARKX asset inflows expand post launch. We've set our initial stop-loss provision at about 3 ATRs below our entry at \$3.	2021-01-25 12:57:4	2021-02-03 15:59:4	9	\$34.00	\$57.21	68.60%	999999990%
ALPHA INSIGHTS	PLTR	The shares of Palantir Technologies (PLTR) appear poised to resolve a lateral consolidation pattern of the "Symmetrical Triangle" variety. If, as we suspect, this consolidation completes a 4th wave of the advance, then the stock should thrust above the the upper boundary of the triangle formation, which would project a measured move to approximately \$43/share. We will attempt to enter the trade at today's VWAP, and set our initial stop-loss provision at 2 ATR's below the entry.	2020-12-17 10:15:0	2021-01-27 13:57:0	41	\$26.60	\$43.00	62.30%	7364%

Bill Cara Biotech, Metals & Top Picks	VXRT	Buying more VXRT. Vaxart 's oral vaccine delivery system is going to be substantially favored over needles that inject fluids into your body. The ear and nose mucosal effect would be front-line defense against the virus the public would want. In mass production, their technology will be far less costly than the competition. Presently, this technology is in phase 1 clinical trial whereas the competition is mostly in phase 2 and 3. But if Vaxaer is successful, they are in a good place to receive maybe \$400 million in OWS funding.
