

FRONTLINE

AUTOMATION

MACHINE OPERATOR

Today's frontline automation machine operators require mechanical, electrical and computer skills to be successful. Gain knowledge in shop math, print reading, quality control, PLCs, and basic computer skills. Learn about basic robotic controls and equipment. Perform basic machine troubleshooting, and more.

Our interactive online classes are led by an expert facilitator. This course includes specialized materials developed by industry professionals. Upon successful completion, participants will earn a transcribed completion award.

Location: This e-Learning platform is augmented with an instructor via Zoom.

When: Two hour classes meet twice weekly for five weeks. There is an eight hour hands on assessment at the Oregon City Campus.

Investment: \$559/participant
