

Energy Efficient Business Grants

The City of Richfield offers grants to local businesses and nonprofits that make energy efficiency upgrades through programs implemented by Center for Energy and Environment (CEE).

The grants can cover **20% of the cost** (up to \$2,500) of eligible lighting, HVAC, or refrigeration upgrades on top of regular program rebates.

How it works

- Contact CEE to schedule a **free, no obligation energy assessment**
- You'll receive a report with recommendations and estimated energy savings, grants, and program rebates
- Your CEE consultant will guide you through the entire project
- The CEE team will complete and submit all grant and program rebate paperwork
- Projects must be completed by November 30, 2022 to qualify
- Grants are available on a first come first served basis until funds are depleted
