

# Transform mobile patient access

Did you know less than 19% of patients take advantage of patient support services?

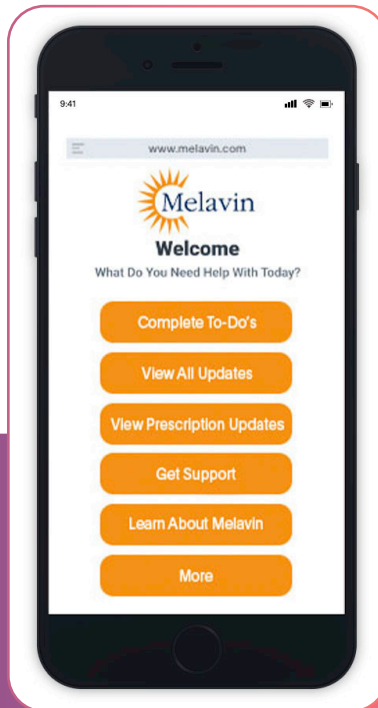

Lack of awareness and access to critical support programs can cause a drop in patient adherence and lost revenue for brands. A platform that delivers support services into the hands of patients can simplify their specialty medication journey while delivering better outcomes for even the most complex brands.

## Meet mobileCare Manager™

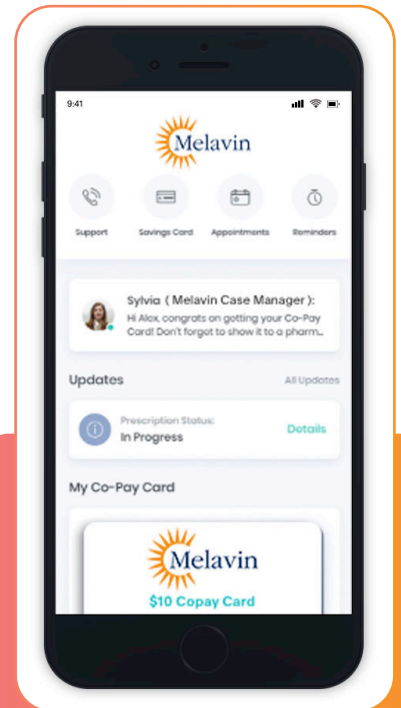

Multiple modalities providing a tailored mobile patient experience based on your brand's needs

**SMS text alerts and reminders**

**Unified mobile web-based experience**

**Comprehensive mobile app**
