

**QA Lead**

## QA Lead

Competitive salary & benefits package

Permanent, Full-time

### About us

At Amberjack we've long been setting the standards in future talent and intake-based volume recruitment. Our advanced systems and intelligent solutions are designed to deliver the ultimate recruitment experience. From intelligent attraction to recruitment process outsourcing and bespoke assessment and selection tools, we work as an extension to our client's teams. We are the quality behind the quantity. We do what's right for our clients and their candidates. We don't know any other way.

### The role

This is an exciting new role in Amberjack to be our Lead QA for our software services. Our software helps organisations to recruit the best future talent by managing the pipeline of candidate applications, providing cloud-based assessments and managing paperless assessment centres. Our leading-edge software is used by large UK and International organisations and this role is pivotal to making sure we delight them every day.

As our QA Lead you will be validating that our suite of .Net and Azure based products and services meet design specifications and requirements. You will take a leadership role on the design of our Test strategies and processes. This is an amazing opportunity for an experienced QA Lead to take their career to the next level and help define the QA model for our business as we go through the next phase of our technology growth strategy.

### Main responsibilities

- Drive a QA focus from scoping to release for all our projects.
- Develop, socialise and embed business aligned QA processes.
- Review functional and design specifications to ensure full understanding of individual deliverables.
- Identify test requirements from specifications, map use case requirements and design test coverage plan.

- Develop, document and maintain functional test cases and other test artefacts like the test data, data validation, harness scripts and automated scripts.
- Develop, document and maintain data driven testing methods.
- Create, execute and evaluate manual or automated test cases using modern solutions and technologies.
- Hold and facilitate test plan/case reviews with cross-functional team members.
- Track decision making during the project lifetime to ensure continuity with requirements and test plans.
- Ensure product release cycles are well managed with documented QA sign-off.
- Design and implement our QA methodologies and tooling.
- Manage client and 3rd party UAT.
- Lead teams of testers, pooled from other areas of the business.
- Usability and accessibility testing.

## Why work for us?

We work with some of the biggest brands in the world, from Unilever and Network Rail, Morrison's, and Virgin Media - helping them to hire the very best apprentices, school leavers, placement students, graduates or interns. We offer a competitive salary and benefits package, a collaborative, open and friendly working environment, and great opportunities for personal professional development.

## How to apply
