Nconnect: An ecosystem for employee engagement and culture activation

For employees to succeed (and contribute to the success of your organization) they need to be connected and aligned to the values and goals of your financial institution.

How do you accomplish this, especially as remote environments become more common than ever before?

Nconnect is a secure, web-based internal communications and information management solution that allows your team to collaborate, access resources, and share content with a data infrastructure that enables efficiencies across your organization.

With Nconnect you can:

Keep your entire team informed and aligned
Our full communication platform gives you all the tools you need to keep your employees apprised of the latest news, announcements, alerts, events, and important updates, a key part of keeping employees aligned with your company's values, mission, strategy, and objectives.

Improve and maintain employee engagement
Our elegant, secure data infrastructure makes it easy for employees to navigate and search content pages, document libraries, directories, and more. The web-based platform also promotes collaboration across departments.

N CONTRACTS

Manage training, policies, and procedures
The integrated learning management system includes training, learning plans, exams, and reporting for easier onboarding and continuous learning. Audit trail and version control ensures that everyone is up to date on the information they need to do their job.

Streamline internal processes
Departments can build workflows around commonly used business processes such as expense reporting, or use the ticketing system to request and track services or information from other departments.

Provide secure access to relevant information
With our platform's strong search capability, users can easily access permission-based, department-level information without wading through pages of irrelevant results.

Key Features:

Secure, web-based system

Unlimited users, storage, updates, and support

Integrated ticketing system to track, prioritize, and solve problems and help requests

Policy and procedure management and distribution, with robust reporting

A blogging module to enable the sharing of subject matter expertise

Integrated learning management that includes training, plans, exams, and reporting

Strong search capability for easy, permissions-based access to content and resources

A wide range of communication tools for employees to interact and stay informed

Visual content management tools to aid employees engagement

Employee recognition tool

Document/forms management to keep teams and workgroups organized

Analytics that provide the metrics to optimize your intranet and achieve your objectives

Nconnect provides the tools you need for a knowledge ecosystem that actively engages your entire organization.
