WHAT OUR CUSTOMERS SAY

“WE CAN’T JUST TELL PEOPLE IT’S
CLEAN, WE HAVE TO LET THEM SEE AND
FEEL THAT IT’S CLEAN”

HYGIENE TRANSPARENCY....

CUSTOMER CASE STUDIES --- CLEANING PROTOCOLS IN PLACE - POST COVID 19

- “If I spray the front of something, you can touch the back of it and it will be wet because the solution gets pulled around the whole surface.” — Joe Mraz, Director of Building Services Operations NYULangone
- Marriott is rolling out enhanced technologies over the next few months, including electrostatic sprayers with hospital-grade disinfectant to sanitize surfaces throughout the hotel. Electrostatic spraying technology uses the highest classification of disinfectants recommended by the Centers for Disease Control and Prevention (CDC) and World Health Organization (WHO) to treat known pathogens. The sprayers rapidly clean and disinfect entire areas and can be used in a hotel setting to clean and disinfect guest rooms, lobbies, gyms and other public areas
- .
- Hilton rolls out Clean Stay Program
- IHG reinforces the Way of Clean – deep cleaning
- **Utilize Technology to Enhance Cleaning, Especially in Guestrooms**
Various technologies are available to improve the cleanliness of your hotel. Electrostatic sprayers with hospital-grade disinfectant may be used to sanitize surfaces throughout the property and in guestrooms

PRODUCT OVERVIEW

FOR USE IN

FULL COVERAGE

SAVES TIME & MONEY

- Hotel Rooms
- Lobbies
- Gyms
- Restaurants
- Convention Centers
- Conference Rooms
- Healthcare
- Management

- Covers hard to reach areas

ANASPHERE Plus™

Anasphere Plus™ is an approved disinfectant for the Human Coronavirus.

Anabec's Anasphere Plus™ offers the best science the world has to offer. Anasphere Plus™ is effective against most pathogens currently affecting the world. It is an EPA registered disinfectant and has over 140 kill claims, including but not limited to: Hepatitis B & C virus, Herpes Simplex type 1 & 2 Virus, HIV-1 (AIDS virus), MRSA, Influenza (All Strains), Measles Virus and Noro Virus. This product is a disinfectant, fungicide, mildewstat and virucide. Anasphere Plus™ is applied after cleaning the surface with Advanced Cleaning Solution. Anasphere Plus™ concentrate is available in 1 quart, 2 quarts or 4 quarts to a box, with a proportioner for securing the proper amount for the desired dilution.

ANASPHERE Plus™

General Characteristics:
- Concentrated Formula
- EPA Registered

Coverage:
3L tank/ 8000 sq. ft.

 NOT FOR USE ON CPVC

Choose the **Anabec System** Better Chemistry. Superior Results.

Anasphere Plus™ Product Info

Classification: Disinfectant
Key Ingredient(s): Quaternary Ammonium Chloride

Packaging

Packaged: 1 quart, 2 qts, 4 qts
Shelf Life: 36 months in concentrated form
Do not freeze
Do not repackage
Keep out of reach of children

Application

Avg Dilution Rate: 2 oz to a gallon
Coverage: Up to 1000 sq ft
EPA Registered: Yes
Airless Sprayer: Yes
Trigger Sprayer: Yes
Foggable: Yes
Mop Bucket: Yes

Properties

Physical State: Liquid
Odor: Mild, Pleasant
Color: Clear
pH: 11.5 to 12.5
Flash Point: N/A
Flammable Limits: N/A
Vapor Pressure: 20
Vapor Density: ~1
Boiling Point: 212° F / 100° C
Solubility in Water: Complete
Evaporation Rate: ~1
Density: 8.66
Specific Gravity: 1.039 grams/ml
Viscosity: Water Thin

• ULV 3L **Go Clean Germbuster #3500**

#3520/5- 5 gallon

- Ultra- Lyte Electro Chemically Activated (ECA) sanitizers. Ultra - Lyte product is up to 100X more effective than bleach and outperforms all other sanitizers on the market today. Kills ALL viruses, bacteria, spores and mold, and is certified 100% organic.
- It is produced from the ECA electrochemical activation of water, salt, and electricity. Ultra-Lyte is a powerful and effective solution for disinfecting and sanitizing – it can kill 99.9999% of all viruses and bacteria in JUST one single application. It can remove biofilm and scale from manufacturing equipment, membranes, filters, and pumps. This greatly minimizes a major contributor to contamination problems and greatly improves the longevity of costly equipment, removing a CAPEX, and increasing bottom-line profitability.

- All microorganisms are destroyed so they cannot build up resistance and no adaptation occurs. Standard toxic chemicals can create strains of pathogens that become resistant over time, because the cell can expel or neutralize the chemical before it can kill it, thereby causing the overall efficacy of chemical cleaners and disinfectants to be significantly reduced.

- **One 3L Germbuster tank cleans 8,000 sq. ft.**
- **100% Organic and safe to use around Food, Humans, and Animals**
