

A CLOSER LOOK AT Premium Pre Starts

WHAT IS IT?

Premium Pre Starts gives you the tools to keep track of pre-starts across your fleet, manage service intervals and handle any actions that need taking care of.

FEATURES AND BENEFITS:

Reporting and alerts

Get a daily summary of pre-start activity delivered straight to your inbox, detailing pre-starts completed and the status of any hazards. You'll be alerted instantly if there's a critical hazard that needs attention. That way, you can make sure pre-starts have been completed, and can keep on top of any outstanding actions to make sure issues are getting sorted.

Action management, including work orders

Found an issue when completing a pre-start? Create a work order, set a deadline and add details like the cost of the work and time frames involved. Then you can assign it to the relevant person in Plant Assessor for action.

Pre-start dashboard

With the pre-start dashboard, you'll be able to see the status of completed Premium Pre Starts across your entire fleet, and which shift they were completed in. You'll also get a top level view of any outstanding issues to be resolved, including work orders assigned and their status.

Bespoke service intervals

When completing pre-starts, depending on the machine type, you can enter odometer or hour meter information, and schedule service intervals. This is great for setting intervals to match manufacturers recommendations, or your own requirements, so you'll never miss a service.

GET STARTED TODAY

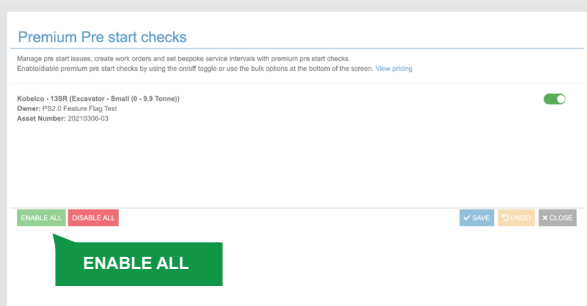

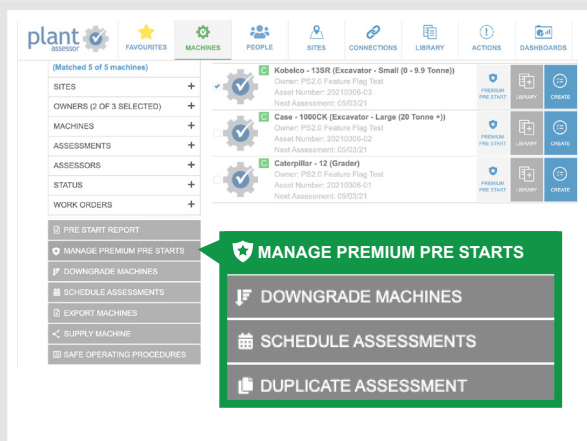

To enable Premium Pre-Starts, simply select the relevant machines from your Plant Assessor account, and hit the **'Manage Premium Pre Starts'** from the left hand menu.

HOW TO USE PREMIUM PRE STARTS

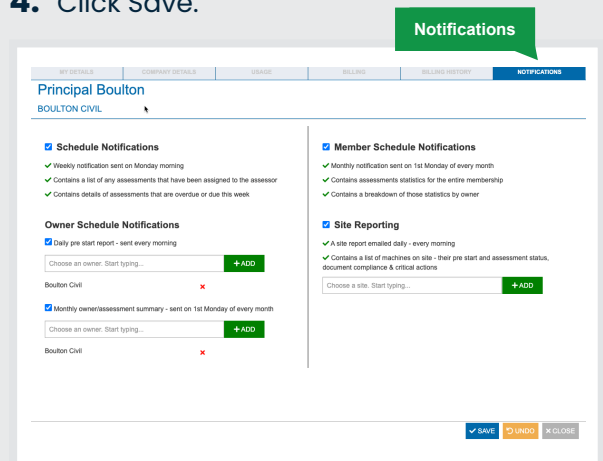

ENABLING PREMIUM PRE STARTS

1. Choose machines you want to enable Premium Pre Starts on from the Machines Screen.
2. Hit **'Manage Premium Pre Starts'** from the left hand menu.
3. Toggle the slider on the machines you want to enable Premium Pre Starts on, or select **'Enable All'** if you want all machines you selected to be enabled.

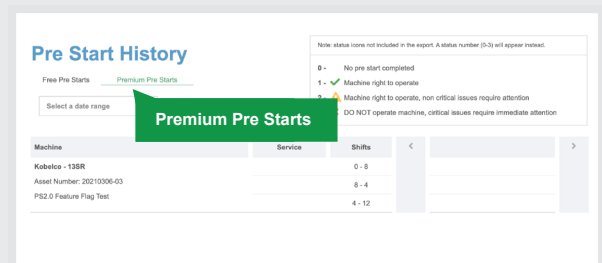

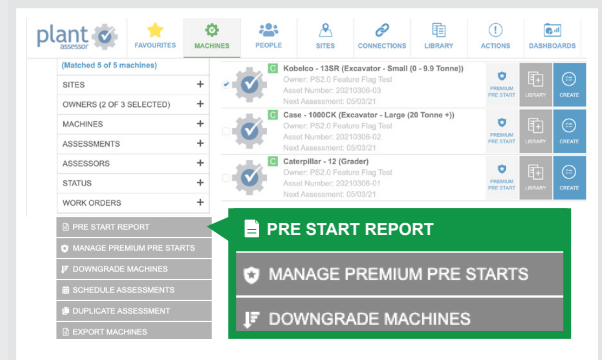

CONFIGURE PREMIUM PRE START NOTIFICATIONS

1. Hover over the account icon top right and select **'MyAccount'**.
2. Select the Notification tab under the heading **'Owner Scheduled Notifications'** tick the Daily Pre Start Report.
3. Select and add **'Owners'** to receive daily reports.
4. Click Save.

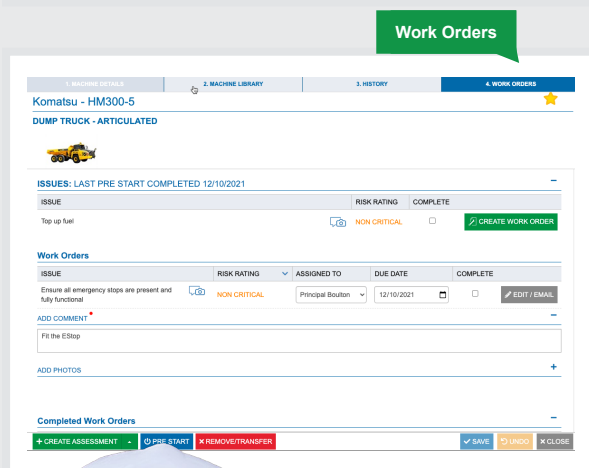

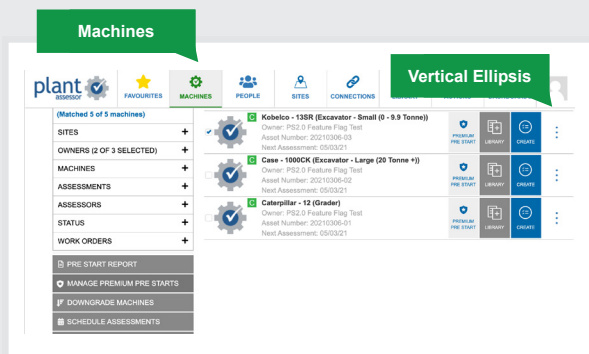

ACCESSING REPORTS

1. From the Machines screen, select the machines you want to report on.
2. Click on the **'Pre Start Report'** option on the left hand menu.
3. Switch between Free and Premium Pre Start reports by selecting the relevant tab at the top of the screen.

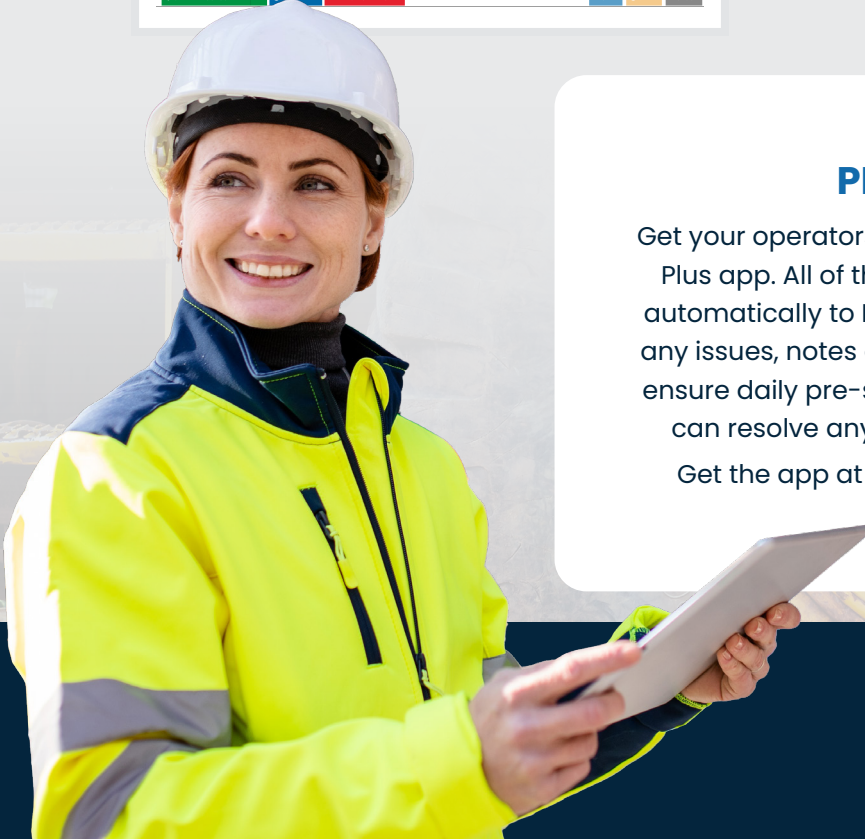

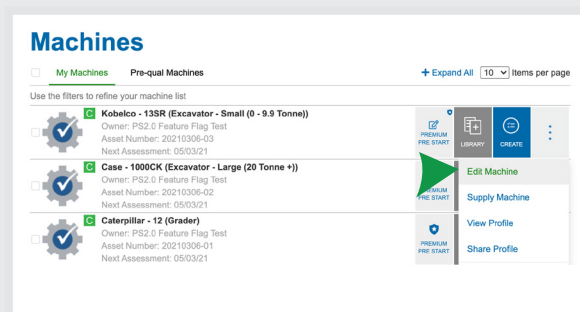

VIEW OR CREATE WORK ORDERS

1. Go to the Machines tab.
2. Select the machine vertical ellipsis (3 dots).
3. Select 'Work Orders'.

SETTING BESPOKE SERVICE INTERVALS

1. From the Machines screen, select the 'Edit Machine' option on the relevant machine.
2. On the 'Machine Details' tab, expand the 'Service Details' drop down.
3. You can Set custom intervals, start times and due dates.

PRO TIP

Get your operators to use the free Pre Start Plus app. All of their pre-starts will sync automatically to Plant Assessor, including any issues, notes and photos - so you can ensure daily pre-starts are complete, and can resolve any issues straight away.

Get the app at prestartplus.com.au
