With pdqSMART-STP Stand-Alone Access Control, keys are eliminated and you gain the added security and convenience of access control without the cost or complexity of a networked system.

Gone are the days of re-keying, just reprogram the door's code and you are good to go!

CONTROL
AT YOUR FINGERTIPS

Manage all of your locks from one centralized, simple, easy-to-use dashboard. Easily grant or revoke access to any door from your smartphone or tablet. Give access to staff and services only when they need it. The tracking system gives you an audit trail of who's coming and going and scheduling capabilities.

SECURE
EVERY DOOR

pdqSMART has a smart lock for every stand-alone access control need; main entrance, interior doors, common areas, offices, storerooms, utility/IT closets, secure rooms, stairwells, emergency exits, garage, gates and more!

American made, commercial grade locks combined with AES 128-bit encryptions keeps your building safe from intruders and hackers.

Perfect for new or retrofit applications. It's fast, easy, and affordable to replace existing locks. pdqSMART fits in the same mounting holes as your current locks. Locks are powered by Bluetooth 5.0 communications and 4-AA batteries. Our locks will continue to operate even when the power or Wi-Fi goes down.

"We keep all of our high value inventory in one room. We purchased a pdqSMART GTS lock and gave everyone access codes. With the audit trail we now know exactly who went in and when."

"My delivery drivers sometimes get back after everyone has gone home so my managers were having to stay late to allow them back in. Now we give each new driver their own access code that only works on the back door."

"Installation of my smart locks was simple and easy, they fit the mounting holes of my old locks, so no door modifications were necessary. The installation went very quickly, under 9 minutes a lock so my tenants were never inconvenienced."

"All of my employees carry smart phones, they didn't want cards. They never forget their phones, and I don't have to manage cards or keys. Thats a win-win."

"I needed a better lock for my business, dealing with keys is just not practical. They are hard to get back when someone leaves. Now I just delete their access code, and the problem is solved."

pdq SMART stp

Cloud-Based	Cloud software increases security, and reduces costs
