DITCH THE KEYS

With pdqSMART-XLS, keys are eliminated. Gone are the days of changing out locks between tenants, just reprogram the door's code and your new tenants are good to go! Every user, young and old get to choose the credential they find most comfortable. Bluetooth 5.0 communications adds more reliability and security than Wi-Fi or Z-Wave.

(retro) FIT EVERY DOOR

Perfect for new or retrofit applications. It's fast, easy, and affordable to replace existing locks. pdqSMART fits in the same mounting holes as your current locks. No hard wiring, no servers or IT guru required, just plug and play. Locks are powered by Bluetooth 5.0 communications and 4-AA batteries. Our locks will continue to operate even when the power or Wi-Fi goes down.

SECURE EVERY DOOR

Secure one or hundreds of doors, manage access from anywhere. American made, commercial grade locks combined with AES 128-bit encryptions keeps your building safe from intruders and hackers. pdqSMART has a smart lock for every access control need; main entrance, unit doors, common areas, offices, storerooms, utility/IT closets, secure rooms, stairwells, emergency exits, garage, gates and more!

CONTROL AT YOUR FINGERTIPS

Manage all of your locks from one centralized, simple, easy-to-use dashboard. pdqSMART's cloud based platform gives you complete control from anywhere, any time! Easily grant or revoke access to any door from your smartphone or laptop. The real-time tracking system gives you an audit trail of who's coming and going and scheduling capabilities.

EFFICIENCY & COST REDUCTION

With pdqSMART wireless locks and cloud infrastructure you won't need to break the bank. No hard wiring, no on-site servers, software, or IT gurus are required. Your investment is protected because locks are future proofed with automatic upgrades and updates. Mobile access to data keeps team members instantly in the loop while the cloud keeps your data safe and secure.
