

HEALTH CARE SOLUTIONS AT WORK...SINCE 2005

## Staff a Nurse and Save - Here's How!

From treating injury to serving workplace health and safety needs, onsite nurses are a great resource of health, safety, and wellness for employees and leadership alike.

### Common Services an OnSite Health Nurses Provide:

- First aid and continual assessment of ergonomics and all work and non-work-related injuries
- Various health Screenings such as viral infection, diabetes, cholesterol, and blood pressure
- Preventative vaccinations and onsite flu clinics
- OSHA mandated certifications, testing, and training including CPR, vision, respirator fit, hearing, and emergency response.
- First Aid Kit monitoring and restocking
- Coordination of all workers' compensation claims, first reports of injury, incident reports, corrective action and medical follow up for work-related illness/injuries
- Return to Work programs
- Processing of Short-Term Disability claims

On site nurses can be utilized to provide services that are often outsourced, saving employers thousands upon thousands of dollars every year. For example, here is how an OnSite Health Nurse affects a 500-employee manufacturer over the course of a year.

Service Provided	Details	Year Total	Costs Averted
Injury/Illness Treatment	Cases NOT sent to an occupational health clinic or PCP	202	\$80,800
Ergonomic Assessments	Ergonomic issues NOT requiring an outside service to detect	39	\$19,320
New Employee Physicals	NOT needed to be outsourced	33	\$4,785
PPE Surveillance	Issues averted = INCALCULABLE savings in healthcare and potential fines	81	
Hearing Tests	NOT needed to be outsourced	253	\$6,625
Vision Tests	NOT needed to be outsourced	253	\$1,898
CPR Certifications	NOT needed to be outsourced	28	\$2,100
Respirator Fit Tests	NOT needed to be outsourced	23	\$4,600
First-Aid Kit Stocking	NOT needed to be outsourced		\$10,800
ERT Training	NOT needed to be outsourced	12	\$3,600
Flu Shots	NOT needed to be outsourced	352	\$4,576
Health Screenings	NOT needed to be outsourced	375	\$15,750
Health Coaching	NOT needed to be outsourced (quarterly, for at-risk population)	564	\$31,020
Blood Draws	NOT needed to be outsourced	102	\$22,400
Personal Health Assessments	596 personal issues relayed to the nurse, 114 of which would have sent to PCP but were NOT (estimated includes 1 follow-up visit)	114	\$45,600

**Total Savings**

**\$253,874**

**Interested in Staffing an OnSite Health Nurse?**

Whether you are a team of 5 or 5000, controlling costs is mandatory for operating a successful business. The onsite nurse has superior safety and health expertise and understands the inner workings of the healthcare system to make it work best for your company. Adding an onsite nurse to your company may seem like a ‘nice to have’, but the lasting benefits for both your bottom-line and your employees makes them essential to have.
