

Advanced Manufacturing Technology

CONCERNED ABOUT SIZE?

**The standard for automatic side rail positioning
can now control your case conveyor as well!**

- **Automatic positioning** Adjusts to any size package
- **True automatic turns** No change parts
- **Easy to retrofit** Install on ANY manufacturers equipment. Control box runs on 110 VAC, no other electrical
- **Simple & Clean** No wires, just one air line runs numerous positioners
- **Reliable & Robust** Just one moving parts leaves little to fail, heavy duty metal construction withstands heavy industrial abuse
- **Cost effective** A fraction of electronic and hand-crank or gear-box type automatic guide rail systems
- **Energy Efficient** Consumes air only during change over and may be run off 1hp compressor if plant air is not available. Requires significantly less power than electronic systems requiring power to hold position.
- **Proven technology** Over 100,000 units installed, no failures

Case Anysize accuracy ± 5 mm for 4" positioning range

*Patent # 8,132,665 & 8,347,920
European Patents Pending*
