

## APPLICATION INSTRUCTIONS FOR THE FRACTION ACTIONZ

Product Number: 21-5W-095

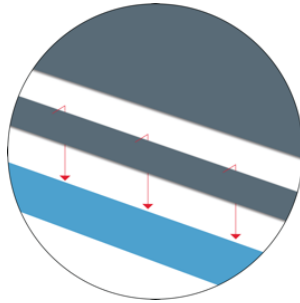

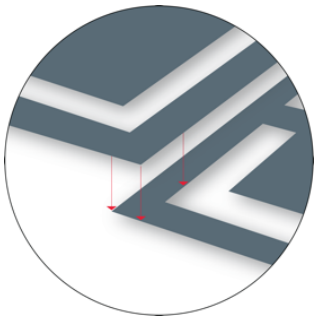

**SIZE:** approximately 15 feet wide by 14 feet long

**ESTIMATED PAINT TIME:** approximately 2 – 4 people for 3 – 6 hours.

**FIRST READ:** Read “General Instructions” completely.

Prepare surfaces as recommended before painting.

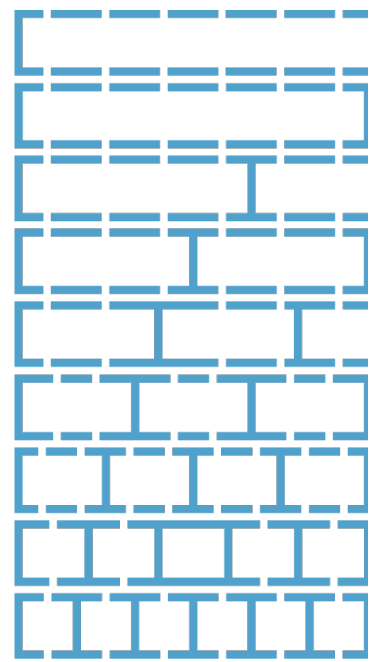

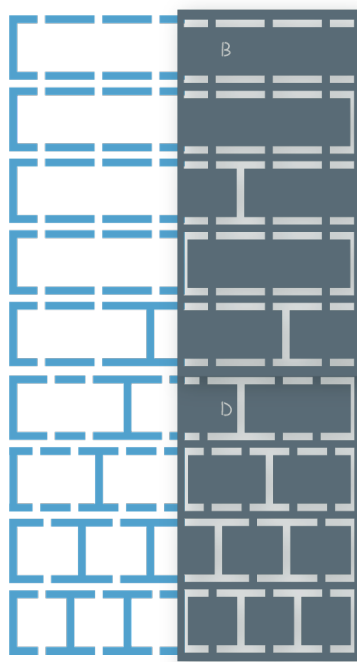

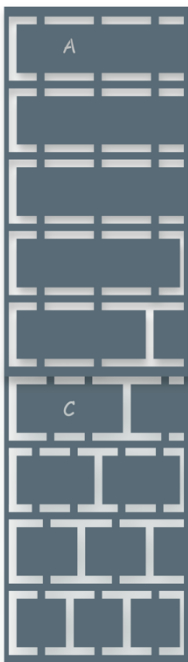

- Place and overlap stencils A and C in desired location by aligning the bottom edge of stencil A to the top cut of stencil C as shown below, left. Paint and re-apply to achieve desired vividness. Once dry, align stencils B and D in the same manner, and repeat.

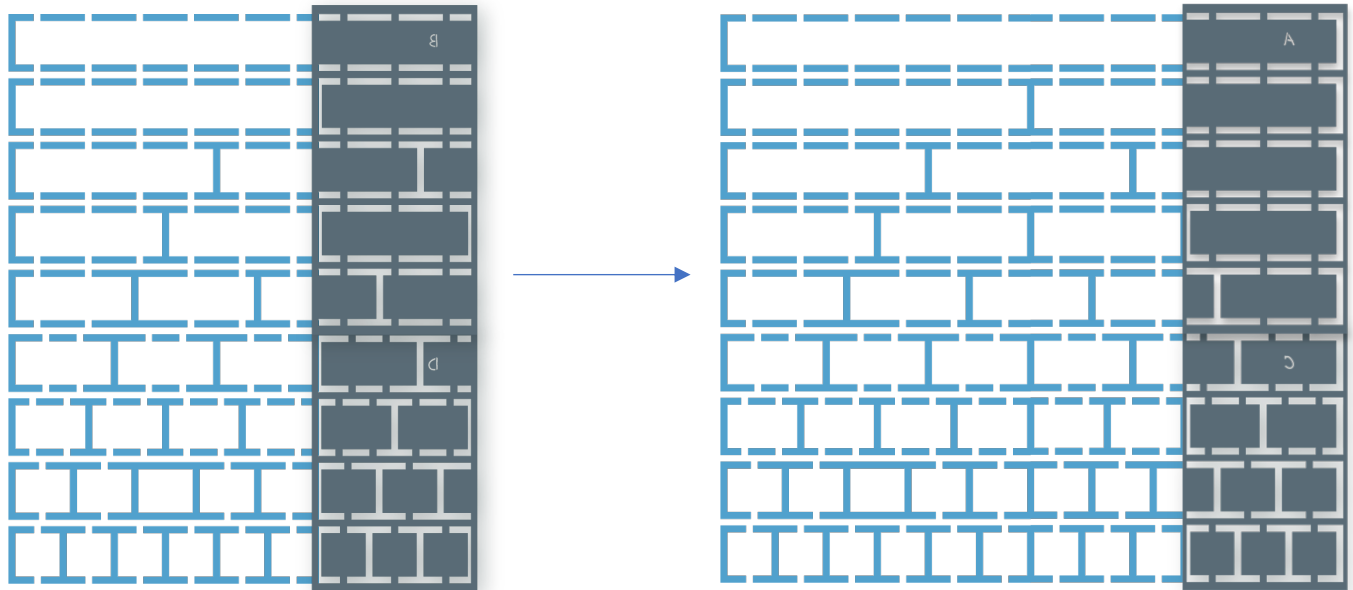

### Pro Tips:

1. Make sure your overlap creates the same amount of space as already shown between fraction bar cut outs.

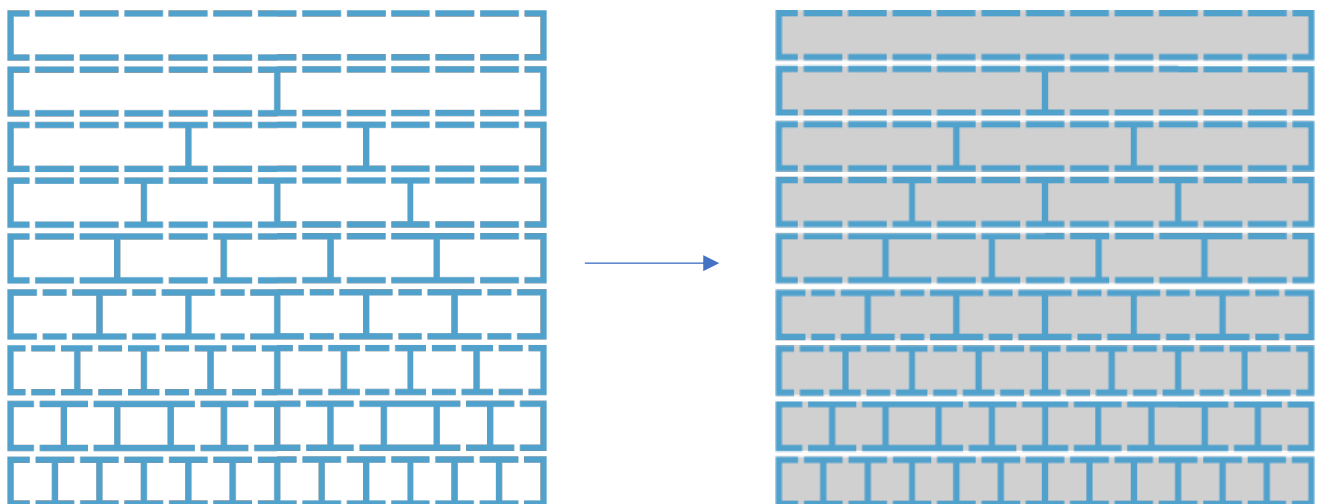

2. Make sure when aligning B and D to the first paint application, that there is no space in between! You are creating continuous lines.

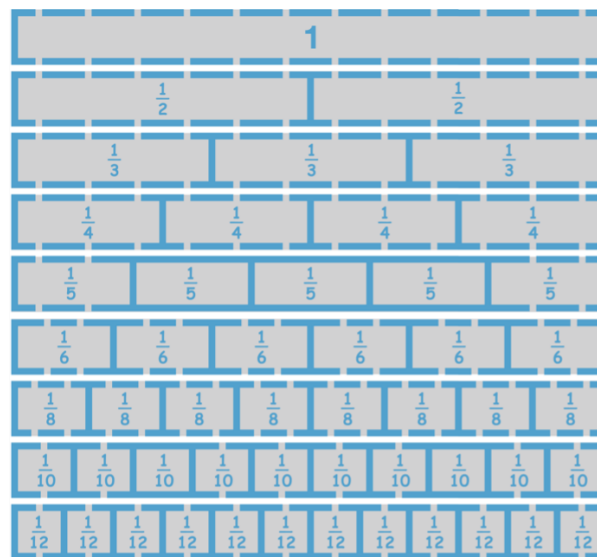

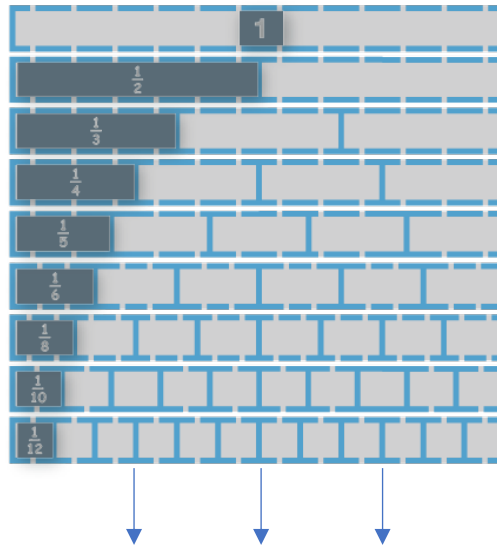

2. Half of your fraction bar should now be complete. Once completely dry, flip and place stencils B and D with the same overlap and placement in step 1 (below left). Again, paint and re-apply to achieve desired vividness. Once your new addition is dry, flip and place stencils A and C with the same overlap and placement (below right) in step 1, and repeat.

3. Your fraction bar outline should now be complete (below left). Before moving on to step 4, feel free to fill in the line gaps. Paint the space of the bars as shown below right with color if desired. This step is not necessary and up to the applicant's overall vision. Make sure your outline is completely dry first if you choose to create a fill.

4. Once your fraction outline and / or fill is completely dry, you may now add the numbers. Place each fraction stencil piece in their respective slots as shown below and repeat as necessary after each fraction is painted. Once all slots are filled, your Fraction Actionz bar is now complete! (See bottom visual for reference)
