

KanTime's private-duty software has been an industry-leading home care software provider since 2007. As aging populations opt for in-home care, the need for private duty services is more prevalent than ever before. KanTime helps to meet the growing demands of patients while delivering the best possible care.

Benefits

Improve Customer Relationships

Eliminate Time Sheets

Speed Up Billing

Features

- + Advanced Scheduling**
SMS and email notifications streamline the entire communication process while scheduling the best clinician for the patient.
- + Verified Time & Attendance**
Fully integrated telephony with task management ensures tracking and verification of time and attendance down to the minute.
- + Automated OIG Validation**
Automatically update the local and national OIG database on a monthly basis and match information against active staff and physicians to ensure all employees are cleared to fulfill the job at hand.
- + Staff Matching Algorithm**
Create schedules based on frequent patterns and ensure that the best staff is employed for the patient according to their skills and the patient's specific needs.
- + Family & Caregiver Portal**
KanTime's Family and Client portals enables parents and caregivers to easily view the patient's medical records.
- + Automated Payroll**
Create shift/visit schedules, track service delivery, and automate payroll processing.
