

Palliative care is complex. As the number of patients living with serious or chronic illnesses grows, palliative care is becoming increasingly important. KanTime's system was designed to address the unique needs of palliative care patients and helps put the focus back on comfort and quality of life rather than on endless streams of paperwork.

Benefits

Comprehensive Documentation

Simplified Billing

Improved Coordination of Care

Features

- + IDT Management**
Improve IDT management with KanTime's palliative-only IDT configurability. Have a PC-only IDT or discuss in conjunction with your hospice patients.
- + Custom Payer Profiles**
Designate one payer or multiple palliative payers in your PC module with the ability to bill Medicare Part B. All profiles can be custom configured according to specific needs.
- + Documentation by Discipline**
All discipline types can perform documentation in the PC module. Disciplines include nurses, SW, Chaplains, Aides, and NPs/MDs.
- + Centralized Clinician Notes**
Eliminate the need for new notes at each visit. KanTime's advanced clinician notes module lets you make adjustments only when needed.
- + CPT Management**
Improved CPT management streamlines billing services as both physicians and NPs can determine which CPT codes are needed for the performed visit.
- + Configurable Database**
Easily flow a patient from palliative care to hospice thanks to a centralized system, ensuring the switch to end of life care is as effortless as possible.
