

PEDIATRIC⁺

KanTime is known as The Gold Standard of Pediatric Home Health Software by the largest pediatric care providers across the nation. KanTime has enabled pediatric home health agencies to experience decreased bill to pay time, improved ease and accuracy of documentation, and enhanced compliance. And most importantly, more time to focus on the little things – children.

Benefits

Always Remain Up to Date

Automate Key Tasks

Extended Care Continuum

Features

+ Automated QA

Set auto QA to a specific percentage of notes and exclude specific caregivers or clinicians as required or as part of the onboarding process.

+ Individual Client Management

Sometimes individual clients need specialized care – and our system makes managing individual accounts easier than ever before.

+ Automatic Eligibility Checks

Auto manage and generate state-based authorization request forms with automatic eligibility checks.

+ Skill Capture

Organize employees by their various types of skills and easily find the most qualified practitioner for the visit.

+ Family and Client Portal KanTime's Family and Client Portal enables parents to easily view their child's medical records, planned visits, outstanding invoices, and more.

+ Automated Payroll

Create shift/visit schedules, track service delivery, and automate payroll processing.
