Unique Design Traits

A dynamic look, this bypass ring combines superior craftsmanship with a rare matched pair of red spinels.

Gently tapering diamond baguettes wrap around the finger, while the bold red spinels mounted in yellow gold are a striking statement.

Gemstone Details

Spinel

One of the most under-appreciated gemstones, spinel is coveted by collectors and gemologists for its range of hues and spectacular optical properties. Spinel was recently added as an official birthstone for August, raising its exposure to new heights. Recognized and prized for its hardness, brilliance, and unlike many other gem types, spinel is rarely treated or enhanced in any way. Many believe the name spinel comes from the Greek word for 'spark'. This name suits spinel well since it is a singularly refractive stone and is formed with cubic crystals similar to diamond, which gives this gemstone remarkable brilliance and fire.
