

REMOTE DRIVER UNIT

Simplify control and extend flexibility with the LANTANA Remote Driver Unit (RDU). Supply power for up to 20 LED fixtures supporting various Class 2 drivers. The distributed low-voltage power system centralizes AC to DC power conversion in an easy-to-access electrical panel and allows optional integration of emergency controls. The factory pre-wired panel offers zones specific to each application, and plug-and-play installation allows rapid field deployment.

MULTI-ZONE FUNCTIONALITY

Experience the ultimate versatility and multi-zone functionality, order LANTANA Remote Driver Units pre-wired to your specifications.

EASY TO INSTALL AND OPERATE

Increase safety and gain direct access to the Class 2 drivers with quick-connect features and a hinging door easy installation, operation, and maintenance.

ALL-IN-ONE POWER

Centralize control of both normal and emergency circuit power in one easy-to-access unit offering UL 2108 and UL 924 ratings. Easily identify clearly demarcated circuits and inputs .
