OneWelbeck

Checking for blood test results

- 1. Log into Compucare.
- 2. The test result panes will highlight how many test results (orders) you have.
- 3. Click on the relevant pane to view all the "New Test Results".
- 4. Click on "All Test Results" in order to check the tests which you have previously seen and sent.
- 5. You can type the family name of the requested patient into the green toolbar (top right).
- 6. To view test results, select the relevant test/patient and click on the "Pacs" icon as shown in the screenshot.
- 7. PACs Icon
- 8. The report will open as a webpage (see below screenshot).

9. To save the report as a PDF press the following keys on your keyboard:

- a. Windows user: Ctrl + P b. Mac user: Cmd + P
- 10. A new small window will pop up (see below screenshot).

NB. The report will include all tests ordered at the same time (the 'batch'). Please be aware that some tests may not have been resulted when you open the report - outstanding results will be displayed as a "no result at this time" (see screenshot).

If you do not want to save partial results please wait for the complete set of results before saving the PDF.

- 11. Make sure you select "Microsoft print to PDF (redirected)" and click on print.
- 12. Windows user: please select where you want to save the PDF on your PC, name the file and click save (as you would do for any other file).
- 13. Mac user: Pressing print will save the PDF to your downloads folder.
