

Amdocs Deployment Project Management

Managing deployment projects can be overwhelming. When you need to deploy on time and within budget, there is a constant challenge to maintain and control hard costs – all the way from construction start to completion to air dates. And if actual expenses exceed your budget, it could impede plans to build other crucial sites where they are needed most.

Amdocs Deployment Project Management places the control back in your hands. Spanning high-level reporting all the way to project management expertise, it's a turnkey service that ensures maximum efficiency across your network deployment lifecycles, with efficient management of hard costs, backed up by on-time, on-budget deployment.

Powered by Amdocs Network Workflow Management support systems, our project managers assume end-to-end deployment responsibility, keeping you in the loop with the most up-to-date and accurate program projections via monitoring of key KPIs, and drilling down to the highest levels of accuracy.

The screenshot displays the Amdocs Network Workflow Management interface. On the left is a dark sidebar with navigation options like Home, Projects, Tickets, Reports, and various project-specific reports. The main area shows a dashboard with a top navigation bar containing 'Tickets' and 'Tasks' tabs, and a status summary for 792 Open and 2208 Closed items. Below this is a horizontal bar with project status indicators: PRELIMINARY (304), PRE-CONSTRUCTION (301), PRE-CONSTRUCTION (16), PRE-CONSTRUCTION (1), CONSTRUCTION (64), ON AIR (27), CLOSE-OUT (20), and DONE (2208). A table below lists individual project tasks with columns for ID, Title, Plan Category, Status, Approved Build, and Date Created.

ID	Title	Plan Category	Status	Approved Build	Date Created
...	...	Site Mod	PRELIMINARY	0% September 2021 Soft Cost Approved	10/14/2021 12:46
...	...	Site Mod	PRELIMINARY	0% September 2021 Soft Cost Approved	10/11/2021 11:25
...	...	Site Mod	PRELIMINARY	0% September 2021 Soft Cost Approved	10/11/2021 11:25
...	...	Site Mod	PRELIMINARY	0%	10/11/2021 11:25
...	...	Site Mod	PRELIMINARY	0% May 2020 Soft Cost Approved	10/11/2021 11:25
...	...	Site Mod	PRELIMINARY	0%	10/11/2021 11:25
...	...	Site Mod	PRELIMINARY	0% March 2021 Soft Cost Approved	10/11/2021 11:25
...	...	Site Mod	PRELIMINARY	0% March 2021 Soft Cost Approved	10/11/2021 11:25

Focus on your core business

Amdocs Deployment Project Management frees you to move away from day-to-day issues related to construction schedules and focus on the issues that create the most pressing challenges. Meanwhile, our cohesive and experienced project managers manage the day-to-day construction schedule ensuring synergies among deployment efforts across markets and regions.

Why Amdocs

Amdocs has a proven track record supporting projects throughout all phases of network rollout and acceptance – including but not limited to RAN, transport and core design, provisioning and troubleshooting services, pre/post launch optimization, provisioning, triage and so on – for multi-vendor, multi-technology heterogeneous networks.

With an experienced network provisioning team staffed by professionals in the area of transport, core, as well as RF engineers, our strength lies in adapting to our customers' needs and requirements, while orchestrating various support teams/vendors to ensure timely delivery.

Benefits

- **Controlled expenses:** Our team provides accurate forecasting, allowing you confidently add more PORs per week
- **Timely deployment:** Consistently deliver on your weekly targets
- **Turnkey solution:** We manage the entire deployment from start to finish, freeing your executives to return their attention to other critical business areas

As a preferred vendor for Tier-1 and Tier-2 service providers across the globe, our vast complex configurations integration experience and holistic approach to network management ensures you deliver faster, within budget and with the highest levels of quality.

Partner with us to benefit from our proven tools, processes and time-tested methods, as well as customized services for all major network equipment providers and technologies, so you can be confident in your ability to meet your customer experience goals.
