

VoiceFriend for Amazon Alexa

VoiceFriend works with Amazon Alexa-enabled devices to provide a powerful communications and safety solution

Keep seniors and their families more informed and engaged.

Simple, easy voice-activated notifications

With the Alexa-enabled VoiceFriend Communications and Safety Solution, your seniors can listen to their daily schedules, care plans and appointment reminders simply by saying "Alexa, ask VoiceFriend."

Boost safety and wellness

Seniors can easily perform their check-ins

Besides receiving a telephone call (and pressing a number on the keypad), or calling the community's designated phone number, seniors now have the option of simply saying "Alexa, tell VoiceFriend I'm okay," to their Amazon Alexa-enabled device.

Your staff is automatically notified which residents failed to perform their wellness check or who need further follow-up, reducing the time and risks involved with manual checks.

VoiceFriend also lets you easily program your own custom follow-up messages, such as "How are you feeling today?" or "Will you be joining us for the outing?"—offering you even greater flexibility to ensure the safety and engagement of your residents, and more efficient use of your staff time.

Augment your current emergency alert system

VoiceFriend's StaffAlert™ solution provides an added layer of safety and protection for your seniors (and peace of mind for families). Seniors need only say "Alexa, tell StaffAlert" to their Amazon Alexa-enabled device to notify your on-duty staff of their need for wellness, housekeeping, dining or maintenance assistance.

Strengthen your support for the impaired

For those seniors with mobility, dexterity, sight or other impairments, the ability to perform wellness checks and/or alert your on-duty staff with just a simple voice command can make a huge difference in the quality of life, safety and overall satisfaction.
