

RSR & HIV Reporting

BETTER CARE FOR YOUR AT-RISK PATIENT POPULATIONS

While Azara DRVS contains some basic quality measures related to HIV, the DRVS HIV/AIDS Extended Module provides a comprehensive set of measures, registries, dashboards and reports for health centers that focus on providing care to patients with HIV. This module includes detailed HIV Lab and Behavioral Health registries, allowing care providers access to status on a variety of behavioral health and social determinants of health (SDOH) assessments. The module also contains a subset of the Ryan White Program quality measures.

Extended HIV/AIDS Quality Measure Set

RYAN WHITE SUBMISSION

Ryan White HIV/AIDS program-funded recipients Parts A-D and their contracted service providers (subrecipients) are required to report client-level data annually to the HIV/AIDS Bureau through the RSR. This module has the capability to create a .csv data extract from DRVS for input into the HRSA Chex tools and subsequent submission to HRSA.

Interested in the Azara Extended HIV/AIDS Module?

The Extended HIV/AIDS Module and Ryan White Submission are not included within the basic DRVS Subscription. **Contact your PCA/HCCN, Azara Representative or solutions@azarahealthcare.com for additional details, including pricing.**
