

# Ensure MIPS Success and Maximize Revenue

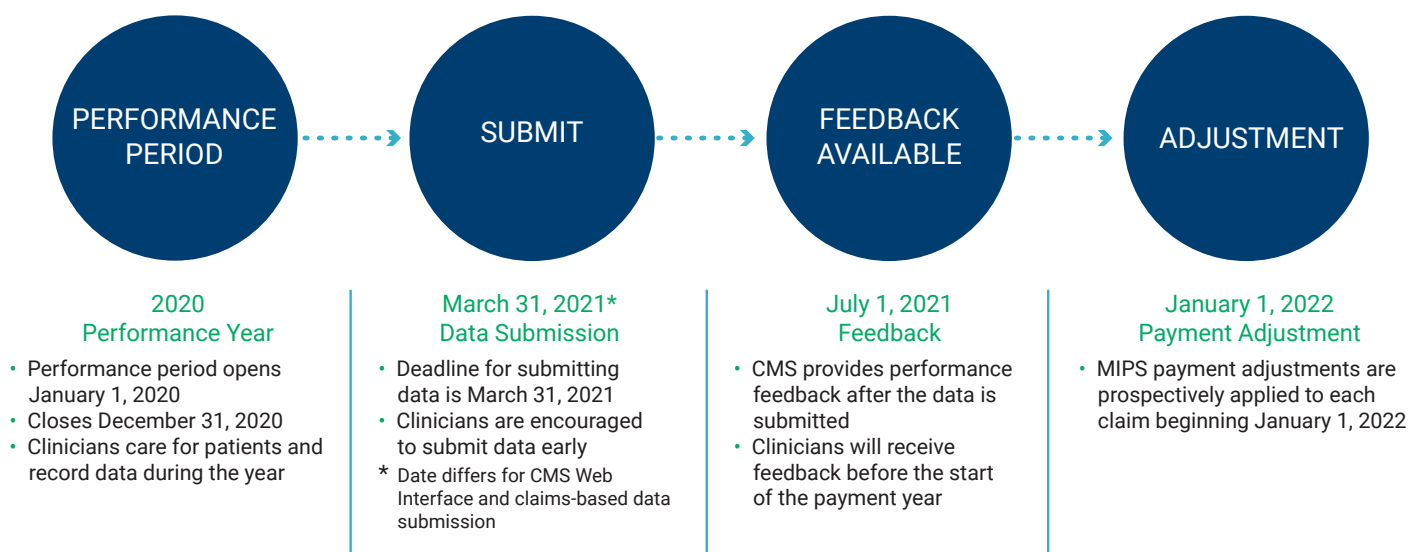

# Ensure MIPS Success and Maximize Revenue

Azara Healthcare helps you maximize your Medicare reimbursements and avoid the negative penalties from the Merit-Based Incentive Payment System (MIPS). Our solutions help minimize workload and administrative burden, while enabling you to improve your MIPS Composite Performance Score.

Depending on your readiness, Azara solutions can improve your scores in any one or all four MIPS categories: Quality, Improvement Activities, Promoting Interoperability, and Cost. Decades of healthcare measures and quality improvement experience make Azara your ideal MIPS technology partner.

Ranked #1  
MACRA & MIPS  
Value-Based Care

The lookback period is two years. Prepare in 2020 for payment adjustments in 2022.

## Multiple EHR expertise

Azara's CMS-certified Quality Registry platform assembles, aggregates, tracks, and benchmarks MIPS reporting data from even the most complex organization for all categories.

- Submit Quality data from multiple EHRs
- Submit registry measures from multiple EHRs
- Provide data completeness analysis per measure
- Perform split submission for Quality including both registry and EHR-direct measures

## Maximized reimbursement

Azara helps you earn every dollar that you qualify for in reimbursement by submitting your data for any or all categories as a group or on an individual level – whichever yields the better results.

## Ongoing monitoring for improved scores

Continually track progress with Azara's guided analytics and intuitive dashboard so you can make targeted improvements in time for your submissions

## Expert guidance

Azara works closely with you to determine measure selection, performance optimization, and understand the necessary data elements for success

## Highest possible score

Azara helps you achieve the highest possible MIPS Score by selecting your highest performing quality measures against CMS performance thresholds

## Eliminate the burden

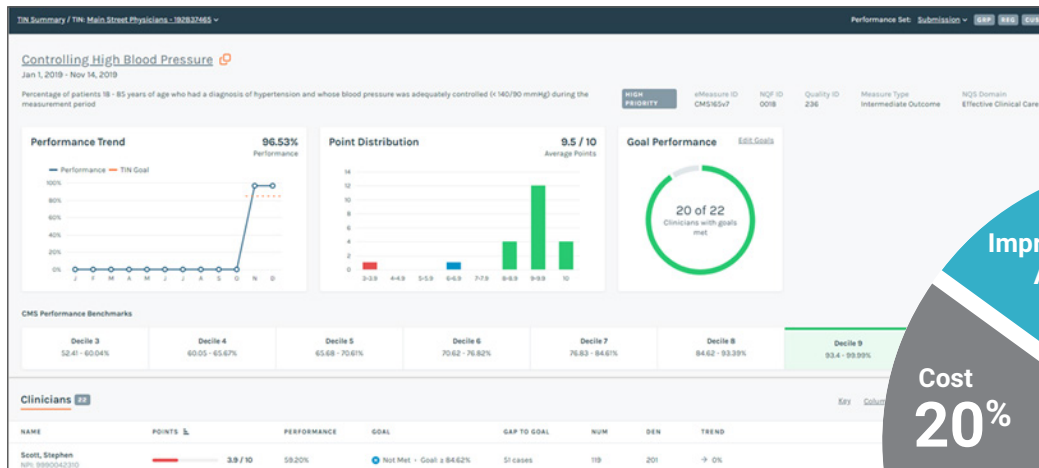

Azara eliminates manual work and can save groups literally weeks' worth of admin time during the MIPS submission period. CMS estimates the following times:

- 4 hours for every registry submission
- 3 hours for every EHR-direct submission

# Easier MIPS Management to Drive Exceptional Clinical and Financial Results

Azara's IgniteMIPS relieves the stressful administrative and time-consuming burden of MIPS overhead and turns your focus toward performance improvement opportunities that drive value for your organization. Secure your success in MIPS and use the program as a catalyst to establish a performance improvement discipline for value-based care that your clinicians can appreciate — and adopt — for years to come.

IgniteMIPS manages every stage of the MIPS process, including eligibility, predictive analytics, monitoring, and submission. The IgniteMIPS solution provides an advanced, analytics-driven workflow that sets up your quality team and clinicians to identify and act upon high-value actions that drive the best clinical and financial results.

## Take the guesswork out of performance

IgniteMIPS provides full transparency into your performance data so you always know where you stand from an organizational perspective down to the individual clinician and measure, allowing you to avoid negative penalties.

- Monitor performance relative to organizational goals and benchmarks
- Drill into performance details to reveal workflow and training issues before it's too late
- Identify opportunities to improve quality within your organization
- Proprietary algorithms will identify top-performing measures and opportunities that improve your scores in any one or all four MIPS categories: Quality, Improvement Activities, Promoting Interoperability, and Cost

## Get your clinicians engaged in MIPS

IgniteMIPS helps you engage and motivate clinicians by aligning to your broader organizational objectives for MIPS and value-based care.

- Set goals for quality measures that are important for your organization and your clinicians
- Create measure sets to manage performance for groups of specialists or departments
- Deliver intuitive and relevant scorecards your clinicians will immediately understand and value

## Get the big picture for quality performance from multiple EHRs

IgniteMIPS will assemble, aggregate, track, and benchmark MIPS reporting data for a holistic picture of quality performance across your organization:

- Compare performance rates at the TIN/group or individual provider level
- Your clinical measure dashboard monitors and regularly refreshes performance for CQM (registry) and eCQM (EHR) measures
- See trending against benchmarks and goals
- Achieve an end-to-end reporting bonus
- Submission to CMS for any or all MIPS categories

Contact us for a free MPS consultation and start maximizing your MIPS score today.

# Empowering Healthcare Transformation

Azara Healthcare is the leading provider of data-driven analytics, quality measurement and reporting for the Community Health and physician practice market. Azara solutions empower more than 1,000 Community Health Centers, physician practices, Primary Care Associations, Health Center Controlled Networks, and clinically integrated networks in 36 states to improve the quality and efficiency of care for more than 25 million Americans through actionable data.

Azara consistently earns accolades as a top population health vendor by industry market intelligence firm KLAS Research and was ranked number one in MACRA and MIPS Support Technology for Value-Based Care by Black Book Research.

In December 2020, Azara Healthcare merged with the population health division of SPH Analytics.
