

OPERATING ROOM EFFICIENCY

Get the insights you need into your OR facilities

The Operating Room (OR) Efficiency solution provides data for core performance indicators centered around performance and how well the operating rooms are being utilized throughout the organization. These OR specific metrics provide a detailed view on the overall hospital level down to individual operating rooms.

The Value of Operating Room Efficiency

This OR Efficiency solution ensures surgical resources are being used efficiently and effectively, using metrics to benchmark and monitor the performance of their Operating Room facilities. This data provides insight into where revenue is potentially being lost or can be generated. This information give great value to an organization to improve intra-operative workflow and resource scheduling practice.

This solution includes the clinical cancellation reasons and PACU boarder time reason analysis. Service and surgeon block utilization are available to improve efficiency of the Operating Room. Other features include room utilization management and best schedules compliance.
