

Case & Crate Locker Door

Installation Instructions for CC2-DOOR

The Locker Door turns any Case & Crate 2.0 Bin configuration into a secure Locker (locks sold separately).

Video guides, spec sheets, and additional support are available at vintageview.com/caseandcrate.

Parts List

(per locker door)

- (1) Locker Door
- (1) Door Latch
- (4) Metal Screws

Instructions

Step 1: Select Door Direction

The Locker Door can close to either side of the Bin unit. Pick which works best for you. The Door Latch (Step 2) will install to the side of the unit in which you want the door to close.

Step 2: Attach the Door Latch

Attach the Door Latch to the side of the wall in which you selected for the door to close. Using the provided metal screw, attach to the center pre-drilled hole.

Step 3: Attach the Door

Install the Locker Door to the opposite side of the wall by screwing the provided metal screws into the three pre-drilled holes.

Pro-Tips:

- For Steps 2 & 3 lay unit on its side for leverage
- Use care to center the door when fastening
- Do not overtighten screws

Step 4: Finish

Repeat until all Bins have been transformed to Lockers! Add Wine.

Pro-Tip: If the Locker doors do not close properly, start by adjusting the levelers at the base unit to ensure the Bin is properly leveled. Also check to ensure the bottom shelf of the unit has been installed with the mounting tabs facing up.

Additional Lockers Doors and locks are available at vintageview.com/caseandcrate
