

SC Exhaust Duct Kit - Large

SC Exhaust Duct Kit - Small

Features

This kit allows the warm exhaust air to be ducted to another area. Ideal if the room adjacent to your cellar is not ideal for warm air to be exhausted into. The kit include the Thermostat Controller, which will turn on and push warm exhaust air away from the WhisperKOOL® unit, preventing the unit from overheating. The in-line fan is capable of moving warm air through 25 feet of 8" flex ducting (not included). The in-line fan can be set to automatically turn on at varying temperatures in order to conserve the most electricity.

Specifications
