# **WHY IS INTEROPERABILITY SO ELUSIVE?**

*Vin Matozzo | CEO & Managing Partner of Paradigm*

Interoperability across various health systems in and out of the supply chain ecosystem will be the differentiator and the definitive strategic advantage of the future. Interoperability refers to the architecture or standards that make it possible for different systems to exchange information between key stakeholders. It allows for better workflows, reduced ambiguity, and improves the quality of care, reduction of cost and heightened efficiency by making the right data available at the right time across the health care continuum. The data fabric that allows us to interweave outcomes clinical efficacy patient satisfaction data governance and integrity revenue cycle capture and supply chain excellence will define the next coming months and years and will be the focal point for trillions of dollars countless hours of research and integration and truly the next frontier of data mastery. Why interoperability can be so elusive and how you can harness the maturity scale and benefit of connecting your data in a meaningful way.. potentially the way that it was always meant to be orchestrated. Recent experts define interoperability as an information system that can exchange with other information systems receiving information interpreting the data cleansing the data and having it almost instantaneously available for use...

## *Power Supply Interoperability Expert Series™:*

(Continued from previous page)

Without this interoperability the great promise of electronic health records supplier providing insight or summary for resilience, patient satisfaction, and better coordinated care all while being most efficient and lowering healthcare costs to serve. Businesses can learn to fuel modern distributed data architecture accelerating time to value unlocking this information. Empowering key stakeholders with a timely consistent, validated, unbiased trusted source to make real time decisions and achievement of ROI. Streamlining data management with integration capabilities that embed and embrace artificial intelligence and machine learning will govern your data and allow you to comply with architecture required to execute your mission with confidence. No matter the characteristic of a problem or complexity of systems and interfaces- the interconnectivity and the ability to present in the current maturity state or harnessing the keys to unlock future access without restriction had been traditionally reserved solely for information technology systems but now a broader definition as we engage as social, political, and organizational factors that truly affect bottom line will differentiate the data leaders from those left behind. Focusing on key tenants of your data architecture and governance strategy while connecting coherent services for users with the individual components have been so technically diverse has never been more challenging or rewarding.

## *Interoperability Expert Biography:*

PARADIGM

# VIN MATOZZO

**CEO & Managing Partner Paradigm Venture Group**

Vin Matozzo is a dynamic and results-oriented, transformational & forward-thinking leader who continually drives change and delivers results for clients, corporations, and consortiums. He is a catalyst for the next level of senior operations executives who are passionate about healthcare, technology and entrepreneurial business development. As a serial collaborator, Vin is constantly in exploration of technology innovations and services that support greater business efficiency and data visualization with LEAN and AGILE methodology. With his extensive skills around process design creating strategies, building consensus/synergies through integration and collaborative approaches engaging stakeholders through cultural silos, Vin has changed the way interoperability is understood within the healthcare ecosystem.

Skilled in designing and implementing innovative business architectures, models, and processes, he has produced dramatic results for his clients. Vin is a LEAN and AGILE process modeling subject matter expert with accolades in all facets from pre-award modeling to post-award monitoring including acquisition strategy, legal and regulatory overview, data visualization, revenue and profitability control, negotiation, value analysis, procurement, logistics enablement, data governance, and disbursement.

For all your interoperability questions, you can contact Vin at [vin@pvgus.com](mailto:vin@pvgus.com) or visit the Paradigm team at [pvgus.com](http://pvgus.com)
