

Life-saving Solutions

Health & Safety, Occupational Hygiene and
Environmental Monitoring

SPECIALISTS IN

Life-saving Monitoring Instrumentation

As the leading independent supplier, Shawcity has supported the Health & Safety, Occupational Hygiene and Environmental Monitoring industries for over 45 years.

Our customers rely on achieving the highest levels of monitoring performance to keep their workforces safe by protecting short- and long-term health.

With instruments available to hire or buy, we work with each individual customer to find the best solution for every project. Thanks to our close links with manufacturers, our technical team provide free and unlimited support, advice and training for the lifetime of the instrument or duration of hire.

For complete peace of mind, we also have a manufacturer-approved in-house calibration, service and repair centre as well as fleet management support.

We offer an extensive range of monitoring and detection for:

- | | | |
|------------------|-------------------|----------------------|
| > VOCs | > Multigas | > Vibration |
| > Benzene | > Mercury | > Air Quality & Dust |
| > Ground Gas | > SF ₆ | > Heat Stress |
| > Single Gas | > Sound | > Fit Testing |
| > Confined Space | > Noise | > Water Testing. |

Hire Department

HIRES AT A GLANCE

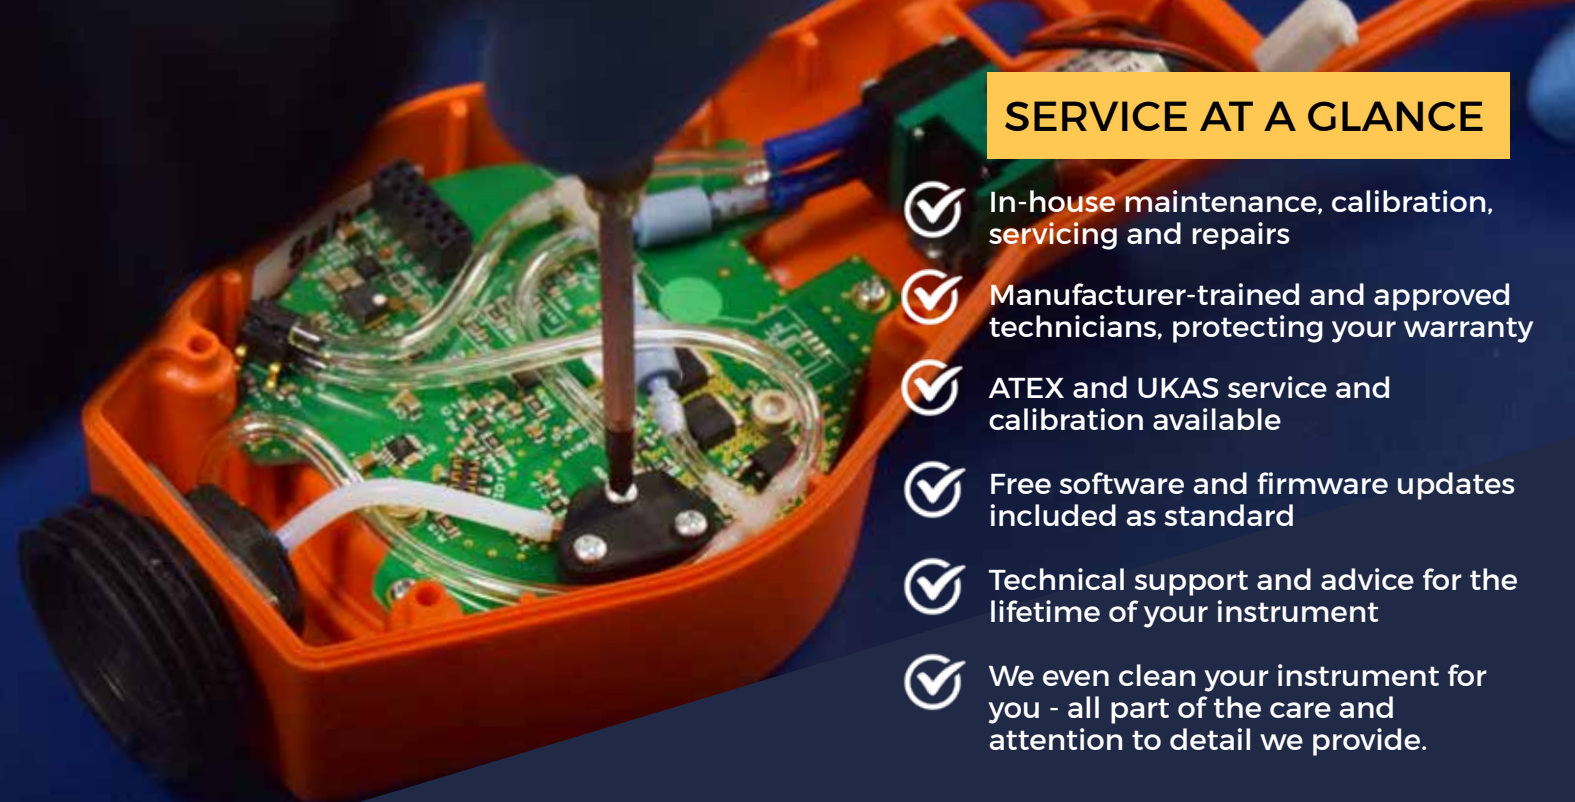

- | | |
|--|--|
| ✓ Our friendly team can advise you on what instrument you will need for any specific task | ✓ Discounts for longer-term hires or multiple instrument hires |
| ✓ Hire costs vary depending on the complexity and value of the instrument | ✓ Courtesy reminders when your hire agreement is coming to an end |
| ✓ Minimum three-day hire period, no maximum | ✓ Free technical support for the duration of your hire |
| ✓ Next day DHL delivery for orders processed by noon (for instruments in stock, excluding dangerous goods) | ✓ Data download service available on request |
| ✓ Easy hire extensions | ✓ In a hurry? You can arrange to collect your instrument from our hire centre in Oxfordshire |
| | ✓ For more information and FAQs visit shawcity.co.uk/hires |

SERVICE AT A GLANCE

- ✓ In-house maintenance, calibration, servicing and repairs
- ✓ Manufacturer-trained and approved technicians, protecting your warranty
- ✓ ATEX and UKAS service and calibration available
- ✓ Free software and firmware updates included as standard
- ✓ Technical support and advice for the lifetime of your instrument
- ✓ We even clean your instrument for you - all part of the care and attention to detail we provide.

Service Centre

Specialists in the provision of monitoring and detection for over forty five years, Shawcity offers expert technical and maintenance services for a wide range of instruments.

✓ Annual Servicing & Calibration

Most manufacturers recommend an annual service for instruments, depending on usage. We'll send you reminders when your service and calibration are due, to ensure your instrument is always performing at its best. To discuss your requirements, including fleet management or hire cover to ensure no down time, please contact our Service Team on Tel: 01367 899554 or email: serviceadmin@shawcity.co.uk

✓ Maintenance & Repairs

We are approved to work on your instrument and we hold a large stock of spares and consumables. We will fully inspect and test your equipment before sending you a report, detailing exactly what work is required and what costs will be involved in getting it back to full working order. You then authorise any work undertaken and parts ordered on your behalf, so you're always in control. You can choose to send your instrument to us or we can arrange collection from you via our courier service at an additional cost.

For more information & FAQs visit:
[shawcity.co.uk/
service-and-calibration](http://shawcity.co.uk/service-and-calibration)

✓ Turnaround

We aim to return your instruments to you as quickly as possible and work to a five-day turnaround period. If you require a speedier service, please contact us to discuss your requirements.

✓ On-Site Servicing

We offer on-site visits from our Field Engineers to service, calibrate or repair your fixed gas detection system or instrument fleet. Please contact our Service Department on Tel: 01367 899554 or email: serviceadmin@shawcity.co.uk to discuss your requirements.

FREE Site visits | **FREE** Demonstrations | **FREE** Product Training | **FREE** Technical Support

Training & Demonstrations

Training on the operation of our instruments is available – at a location of your choice or at our offices in Oxfordshire. Different levels are available from basic operation to the more advanced user.

Shawcity also offers competitively-priced industry courses to show you how to take measurements in the workplace. On completion of these one-day courses, you will receive 5 CPD points (1 learning day) and a certificate of attendance.

To enquire about training options visit: shawcity.co.uk/training

CERTIFICATION

Shawcity offer 'Certificate of Competence' training in the use of all the instruments we offer, which can include both Operator Level (basic use of the instrument) and Supervisor Level (Operator Level plus basic fault finding and data downloading).

DEMONSTRATIONS

Shawcity have a team of product specialists who are based across the UK and will happily come to you to provide a complimentary demonstration of any of our products. We can deliver demonstrations to your team at your premises or you can visit our Oxfordshire office and workshop.

Technical Support

We offer free, unlimited and impartial support through the entire process of instrument selection and ownership or hire. From advice on selecting the correct instrument for the job to after sales care, we are always here when you need us.

If you would like technical support, please try to ensure you have your instrument and/or the serial number to hand.

Simply call or email us and a member of our team will get back to you.

USEFUL INFORMATION

- ✓ For instrument datasheets, manuals and downloads, use the search bar on our website to locate your product. All related documents can be found on each product page.
- ✓ FAQs can be found at the bottom of this page (shawcity.co.uk/customer-support) or Hire/Service & Calibration pages.
- ✓ Our Technical Support Team have direct links to manufacturers to help with technical enquiries.

City Technology OEM Gas Sensors

As EMEA strategic channel partners to City Technology, our sensors are used in personal and fixed safety applications by leading instrument manufacturers across industries including: Oil & gas, semiconductor manufacturing, chemical plants, power stations, waste water treatment plants, boiler rooms, hospitals, tunnels/car parks, R&D and many more.

Whether you monitor common hazardous gases or more exotic gases, we have a solution to suit the precise requirements of your specific application or instrument. We can support any size of project and our minimum order quantity is one

Electrochemical Oxygen:

Two types available - capillary or membrane. Capillary technology offers concentration values (ppm) while membrane measures the partial pressure (% vol).

Electrochemical Toxic:

Covering the majority of toxic gases, the electrochemical sensor is available in;

- **1 series** - Analogue (slimline)
- **i series** - Digital (slimline)
- **3 series** - Original design
- **4 series** - Industry standard for use in portable instruments
- **5 series** - Premium range
- **7 series** - General gas detection
- **Micro** - Smallest, most compact
- **EcoSure** - High quality CO detection
- **Sensoric** - 4-20mA pre-calibrated (for selected gases).

Catalytic:

Used for detection of combustible gases at concentrations below the Lower Explosive Limit (LEL).

Fixed Gas Detection

Shawcity provides a flexible range of fixed-point gas detection systems. We can survey, design, install, commission and service standard and bespoke systems to suit every requirement.

We work closely with world-leading manufacturers to ensure we have the widest and most comprehensive independent range of options to offer our customers.

THE BENEFITS OF USING SHAWCITY

- ✓ Free site visit - Shawcity will carry out a survey of your existing system (applying gas if necessary) to ensure it is fully operational and performing as required.
- ✓ Service plan options available including site visit reports, call-outs, parts discounts, maintenance visits, unlimited remote support, preferential labour rates and breakdown call-outs.
- ✓ Tailored to you. Fixed systems are bespoke to meet specific needs and requirements.
- ✓ Our engineers are all CSCS and SSSTS certified to carry out work on all sites.
- ✓ ISO 9001:2015 certified SafeContractor accredited

Fixed Gas System

The components of a Fixed Gas System vary depending on individual requirements. However, a typical system will include the following:

- Gas-specific Sensors
- Control Panels
- Sampling Systems
- Alarms

We can also provide addressable controllers and integrate into existing systems.

Visit:
shawcity.co.uk/fixed-gas for
Service Contract
options

Service Plans

Ongoing servicing and maintenance of any fixed system is essential following installation.

It is usually recommended a fixed system should be serviced and calibrated every six months but service intervals will depend on the types of sensors installed.

Full Service Plans offer better value for money and include parts discounts, emergency call-outs and telephone support in case of emergencies.

📅 **Free site visit**

New clients are entitled to a free-of-charge site survey.

🕒 **5 years**

Lock-in a fixed price for up to five years when choosing a Service Plan.

Calibration Gas

Shawcity offers a full range of bump test and calibration gas for testing portable and fixed gas detection monitors.

Available in 34, 57 and 103 litre cylinders, we stock a wide variety of ready-to-use gases, along with regulators, accessories and adaptors, to help make bump testing your instrumentation as straightforward as possible.

We also stock calibration gas mixtures for instruments that require bump testing with more than one gas in a single cylinder.

Please note there can be a 2-3 week lead time, depending on which gas you require. We only hold stock of certain high turnover products, to ensure you always receive the highest quality gas with the longest possible shelf life.

Visit:
shawcity.co.uk/
calibration-gas
for gas options

REGULATORS

Shawcity sell a range of calibration gas regulators which regulate the flow of gas to the recommended manufacturer value.

Our trusted calibration gas supplier Calgaz recommends using a specific regulator for individual gas applications to avoid cross-contamination and recommends changing regulators every two years, to ensure optimum performance.
