

The background of the slide is a dark blue field filled with numerous small, bright blue dots. These dots are arranged in several distinct, flowing patterns that resemble particle trails or data streams. One prominent trail starts near the top right and curves downwards towards the center. Another trail is more horizontal, located in the middle of the slide. A third, more complex and jagged trail is visible in the lower half of the image. The overall effect is one of dynamic movement and digital connectivity.

PVM'S PALANTIR TRAINING OFFERINGS

PVM can provide both Palantir user and technical training, upon request.

PALANTIR QUICKSTART TRAINING

Description: The Palantir QuickStart course provides every analyst with the information needed to hit the ground running. Analysts will become familiar with the application and get an intuitive sense for how to use it and where to find what they need. Students will learn how to:

- Perform searches
- Perform SearchArounds
- Use the Graph Explorer
- Use and extract information from the Browser
- Use the Histogram, Timeline, and Flows features
- Create presentations

Length of Course: 4 Hours.

Desirable Prerequisites: None.

Locations Class Offered: On-site at client's location or PVM Training site (300+ sites worldwide).

Minimum/Maximum Learners: A minimum of two students and maximum of six students are allowed for this course.

Training Offerings

PALANTIR BOOTCAMP TRAINING

Description: The Palantir Bootcamp course builds upon the material taught in the QuickStart course by teaching analysts how to tie together several pieces of functionality across large datasets of both structured and unstructured information. QuickStart is not a prerequisite. Specific advanced techniques are also taught, including knowledge of how to:

- Perform advanced searches (document searches, path searches, filter searches)
- Leverage SearchArounds to ask conceptual questions
- Shoe boxing/data management techniques
- Extract meaningful information from unstructured datasets easily
- Use and extract information from the Browser
- Use of the Histogram and Timeline (Advanced)
- Publish and Subscribe data/collaborate with other analysts.

Length of Course: One Day, 8 Hours per Day.

Desirable Prerequisites: None.

Locations Class Offered: On-site at client's location or PVM Training site (300+ sites worldwide).

Minimum/Maximum Learners: A minimum of two students and maximum of six students are allowed for this course.

Course Materials: Palantir Bootcamp Training Guide (included in course).

Training Offerings

PALANTIR WORKSHOP TRAINING

Description: PVM provides custom-designed workshops to help analysts learn specific workflows and skills against your data. Available workshops include Searches and Filters, Data Import/Export, Ontology Design, and Extraction, Sourcing, and Entity Resolution. Choose from an existing workshop curriculum or have PVM design one just for you.

Length of Course: One Day, 8 Hours per Day.

Desirable Prerequisites: Palantir's Bootcamp Training.

Locations Class Offered: On-site at client's location or PVM Training site (300+ sites worldwide).

Minimum/Maximum Learners: A minimum of two students and maximum of six students are allowed for this course.

Course Materials: Workshop training guides with examples, notes, and instructions to keep (included in course).

Training Offerings

PALANTIR INTEGRATOR TRAINING

Description: Palantir's Integrator Training teaches system administrators and developers how to install, configure, and administer the Palantir system. Students will learn through hands-on exercises and labs how to:

- Extend Palantir's Ontology APIs by writing custom Makers, Approxes, Display Formatters, and Validators
- Use Palantir's ClientConnection APIs to programmatically query, modify, and export information
- Leverage Palantir's powerful data import pipelines to intelligently resolve ambiguous data together
- Export data to third-party applications, including GIS systems

Length of Course: One Day, 8 Hours per Day.

Desirable Prerequisites: Palantir's Bootcamp Training.

Locations Class Offered: On-site at client's location or PVM Training site (300+ sites worldwide).

Minimum/Maximum Learners: A minimum of one student and maximum of four students are allowed for this course.

Course Materials: Palantir's Developer Guide and Labs (included in course).

Training Offerings

PALANTIR DEVELOPER & INTEGRATOR TRAINING

Description: This course combines the content of the Developer and Integrator courses. The course teaches software developers and system engineers how to extend Palantir's open platform via APIs and data exchange formats. Developers will learn how to add custom functionality by writing code in labs to enable a specific set of workflows tied together at the end. Developers will learn how to:

- Extend Palantir's Ontology APIs by writing custom Makers, Approxes, Display Formatters, and Validators
- Use Palantir's ClientConnection APIs to programmatically query, modify, and export information
- Export data to third party applications, including GIS systems
- Leverage Palantir's powerful data import pipelines to intelligently resolve ambiguous data together.

IT combines the above developer training with important integration techniques. It teaches system administrators and developers how to install, configure and administer the Palantir system. Students will learn through hands-on exercises and labs how to: Install, securely configure, and administer Dispatch, Search, Job servers and Raptor servers, Scale and tune deployments, Develop and manage ontologies, Set up Data Import Pipelines.

Length of Course: Three Days, 8 Hours per Day.

Desirable Prerequisites: Palantir's Bootcamp Training.

Locations Class Offered: On-site at client's location or PVM Training site (300+ sites worldwide).

Minimum/Maximum Learners: A minimum of one student and maximum of four students are allowed for this course.

Course Materials: Palantir installation and Administration Guide and Palantir Developer Guide and Labs (included in course).

Training Offerings

PALANTIR TECHNICAL WORKSHOP TRAINING

Description: PVM provides custom-designed workshops to help technical professionals learn specifics about their Palantir system. PVM will design a custom workshop to fit your needs.

Length of Course: TBD based on scope of desired training.

Desirable Prerequisites: Palantir's Bootcamp Training.

Locations Class Offered: On-site at client's location or PVM Training site (300+ sites worldwide).

Minimum/Maximum Learners: A minimum of two students and maximum of six students are allowed for this course.

Course Materials: Depending on your workshop, PVM can provide Palantir installation and Administration Guide and Palantir Developer Guide and Labs (included in course).

Training Offerings

ON-GOING TRAINING SUPPORT

PVM's PALANTIR TRAINING SME Services available with our Ongoing Training Support are outlined below:

- Delivery of a range of training courses and services to a client, including front-end user training, implementation/support training and engineer/developer/technical training
- Tailored, client- specific training modules
- Gather and integrate live, real world data and relevant practical exercises into training modules
- Development and delivery of web- based and virtual training offerings and services
- Training Support when you need it and available for your entire team

Length of Support: Provided on an annual basis.

Locations Support Offered: On-site at client's location, PVM Training site (300+ sites worldwide), and remotely.
